

The City of Tempe Facility Services Division of Tempe Public Works Department may be able to provide limited electrical service to special events at specific locations or public venues. Event producers should consult directly with the Special Event Coordinator and Facility Services to discuss all electrical needs for their event. (*This includes the number of vendors, amperage needs of each vendor, needs for electrical service for lights, sound systems, etc.*) The event producers should work with these officials to show electrical service information on the Site Map of the event.

- Facility Services Division cannot provide generators, light towers or extension cords for events.
- Event producers must obtain permission from a City of Tempe electrician to tap into any City property power source.
- The costs of using electrical panels and electrical supply sources at a Tempe facility and/or venues must be paid by the event producers.
