I am very excited about the initiative to nominate Tempe as the community selected to get Google Fiber.

After operating for 18+ years at a location in Phoenix we relocated to our current location in 2003. What a joy it has been working with the City of Tempe! Our operations, curricula and our community outreach activities have involved us with several city functions including the Tempe Chamber of Commerce, Tempe City staff, the Tempe Police Department, Tempe Rotary Clubs and the Tempe City Council and Mayor. I have been very impressed with every aspect of our affiliation and the extent of accessibility and active support for businesses and residents. My experience as a business leader in private higher education has been very gratifying, particularly in light of the tremendous presence and influence of ASU. The City of Tempe has communicated respect and support for what private education brings to the table to supplement and augment overall education platforms producing highly skilled and qualified workers to continue driving current and future success. Tempe has consistently demonstrated a knack for being innovative and for embracing change and adapting technologies in a cohesive, manageable and effective manner.

There is no doubt in my mind that Tempe would make an excellent choice that would make Google proud.
