GIS Students Need to fulfill your Internship?

Looking to get some good GIS experience?

Want to work for one of the first GIS systems in the state?

Interested in learning great skills in a real world GIS department?

At the City of Tempe, we work with engineers, city planners, surveyors, technicians and citizens to make our city the best place to live, work and play. We use Bentley MicroStation, Intergraph MGE, MapInfo Professional, ESRI ArcMap, Autodesk MapGuide and a number of other software packages to produce maps, websites and data. If you would be interested in an internship please contact us at GISInternships@tempe.gov with a brief explanation of where you are in your program, what your professional goals in GIS are and a resume highlighting your education and experience in GIS.
