The City of Tempe is offering the Grey Water Rebate Program to reduce the amount of water used by its customers. System must be in compliance with the Arizona Department of Environmental Quality guideline rules developed in January of 2001 covering grey water systems. A PDF of their brochure can be found at the following link: www.azdeq.gov/enviro/water/permits/download/graybro.pdf. Grey water must be used on your private residence for irrigation and not for food producing plants with the exception of citrus trees and nut trees. Water must be supplied to landscape to minimize standing or ponding water on the surface of the soil. Stored grey water must be covered or screened to prevent mosquitos from breeding. Grey water can only be applied by flooding or a drip system and not by pressurized spray. Rebate amount of 50% of the purchase price of system components up to \$200.00 per household will be available after January 1st 2015. For additional information please call the Water conservation Office at 480-350-2668

Note: All rebates provided will be on a first come, first served basis, subject to availability of funds
