

Dwight Park Improvements 2nd Meeting Survey Results April 7 – April 21, 2016

1. Of the three options for a Dwight Park play structure for ages 5-12, which do you prefer?

Total Submissions: 30

2. Why did you choose this option?

Option A:

1. The smaller slides allow younger children to enjoy them.
2. Nice and tall, with lots of options for climbing and play.
3. I like this one due to not all kids like big sides. This one is for all ages one little side one big slide it would be best for the kids!
4. More play options for a larger developmental range.
5. I like the 2 different slide options for different ages
6. More slides of different heights.
7. Looks like it is the most interesting and creative of the three.
8. I chose A because it has the large twirl slide in addition to the small straight slide. My nephew is scared of the current slide at the park so he won't go down it, and with our first child due this month, that is a big consideration for me (a slide for bigger and smaller kids).
9. Option A has 2 slides one of which appears to be better suited for smaller children.
10. It has the most appropriate play areas without being afraid your child's going to fall off and hurt himself
11. It has good swings and climbing equipment.
12. Best option to support a wide variety of activities and age groups. Usable by both toddlers and adolescents.

Option B

1. Colorful and looks most fun
2. Seems to be the largest space wise and offer the biggest variety of play stations
3. I like that this options offer numerous items for multiple children.
4. It seems like it has the most variety of things for the kids to play on.
5. Don't have kids so I'm going just based on aesthetics and guessing! I like the look of B the best. I like the orange and green and blue better than the red and yellow of A. C looks the least fun, the least interactive, and looks like a holding pen.
6. Colors and design
7. It looks more intriguing.
8. I like the colors and the number of play options available.
9. This particular option seems like it has the most use of playground space. Larger (larger looking) and more attributes for children to play with. Keeping them at the playground rather than wandering off because of lack of space and/or not making use of the new play structure.
10. Appears to have more climbing options.
11. My baby 5 years said B is best option! A lot to play with!
12. It looks appropriate for all ages - not one.
13. Playground B is definitely cooler.
14. It has a greater variety of things for kids to do.
15. It looks like more kids can play on those structures all at one time.

Option C

1. This has more room and not as cluttered from the other two structures.
2. Looks like this is the most spacious and the simplest structure.

Other

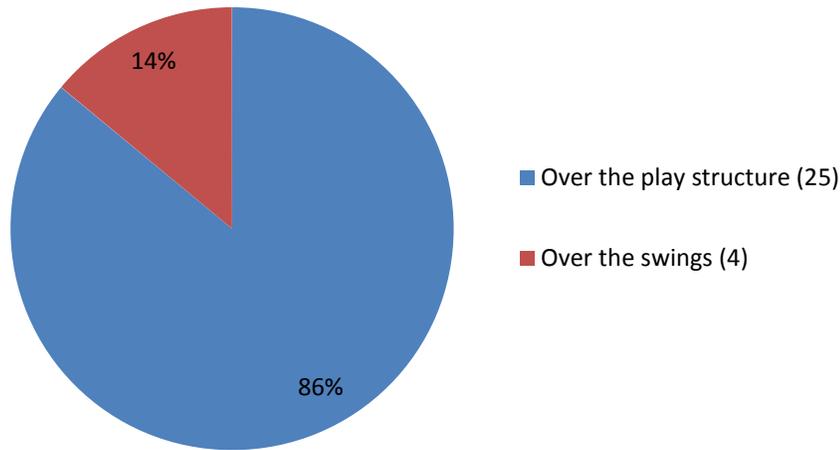

1. Why do you need a sidewalk to get to a playground? Disabled folks? Sorry.

3. Is there anything else you'd like to see in either option?

1. Possible option for some children with disabilities.
2. I would like to see 1 pickle ball court for the older kids to make this playground more interesting to a larger age group. I do like the climbing structures very much, both the net climber and the boulder climber so those are good. I do not like the benches placed at the Basketball Court. Dangerous to those sitting to watch. I suspect 2 benches under the trees at the south side of the park to watch the soccer games would be more appropriate and a lot safer. Those benches planned are just too close to the basketball court and make no sense in the sun. I also like the addition of a couple more trees for our park. Wonderful. My nephew is a big fan of the wheel currently at the park so he can "drive" ... might be an easy addition to any of the structures.
3. None.
4. N/A
5. The newer tower with 3 slides at Kiwanis Park is wonderful.
6. Monkey bars are a great option for children. Teaches hand and eye coordination.
7. Could the "rock climbing" wall of A be used on B (instead of the climb-up piece where you put your feet into the holes)?
8. NA
9. No.

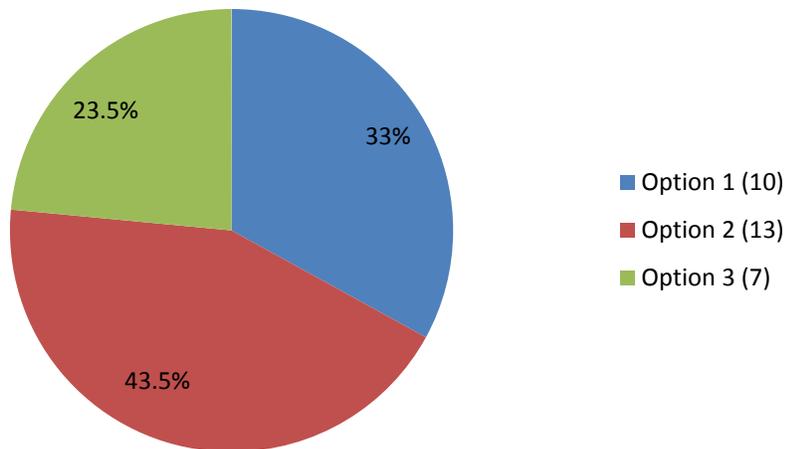

- 10. I like how the colors are not traditional playground colors. While they are bright, they're not your cliché red, yellow, etc. I like how the neutral tones compliment the area.
- 11. no
- 12. Taller slide
- 13. If a low slide could be added to Play Structure B that would be good.
- 14. A cover above the structure for the high summertime temperatures.
- 15. More trees to be planted
- 16. I would like to see the grills rotate. I would like to see the maintenance guy turn off their trucks. I don't believe that parks need herbicide. They are full of weeds and can be trimmed when the three tier lawn employee do their work.

4. Where would you like the shade structure placed?

Total Submissions: 29

5. Of the three color schemes for the playground equipment, please choose one. The existing site equipment is forest green, of which some will be reused.

Total Submissions: 30

6. Additional comments

1. Red is always alert color of slides to kids
2. Please try to offer more diverse age group options so that a larger population can enjoy the park. 2-10 is not adequate for our particular neighborhood. Soccer and basketball is not sufficient to keep the older kids involved. Volleyball or pickleball would be a very good addition to the playground equipment, swings, slides, climbing. I don't see the east sidewalk drawn but I like that the west sidewalk isn't a straight walk and I love the idea of lighting it. Very nice.
3. So excited to see these improvements become a reality! We are just a couple of houses down from the park, and take my nephew there often. Our first child is due in April, and I know we will be spending more and more time at the park.
4. Add ramada for parties/gatherings.
5. A jogging path around the park would be a great future addition. A 2nd shade structure would be great too.
6. Here in Arizona, I would like to see both groups of play equipment and swings have shade structures. At least place the shade structure over the play equipment with the swings getting lots of shade from the placement.
7. Thanks for doing this!
8. My kids are very excited for the changes!
9. I, and other neighborhood home owners, love to run. We would love to see nice park lighting at night, as well as clear and defined pathways. Maybe even include lights to highlight the pathway, not just the park itself.
10. A sidewalk connecting north and east corners of park would be great. An additional shade structure would be great in the future.
11. Lime Green, Bright Yellow and Maroon would be good too. We'd like to add a second shade structure in the future too. What kinds of new trees will be added? Will there be bubblers for them if they require water?
12. I'd like to see a jogging path around the perimeter in the future.
13. Option 2 = cooler colors
14. Quit wasting money. Don't waste money. Wasting money is wrong. Don't make metal signs. Don't waste gasoline. Don't forget the grills. I believe night time has many drug users. Burned picnic tables.

Other comments received

1. March 30, 2016 phone call - Suggestion for Dwight Park improvements. Would like to see them put in an urban lake for fishermen, for the neighborhood and for wildlife.
2. April 12, 2016 email - I still think \$320,000 is a lot of money for a park children enjoy as is. I hope someone is looking into the rotation of the BBQ grills and the ridiculous use of herbicide around trees and poles in all the parks. Don't waste gasoline or money. Please forward to people who care.
