The south of US 60 is very poorly connected, inspite of having a HUGE residential area. This circulators would provide connectivity to the people who would like to take the express route from Mill & Baseline. Further, Most big businesses are in the Southern part of Tempe.

Example: Arizona Mills, Fry's Electronics, Walmart Super Center, Home Depot, Costco, IKEA, Tempe Auto Mall (erstwhile Auto Nation) , LA Fitness etc., While all of these generate so much of revenue(meaning taxes for the City) why is it that the South side has been neglected and it has to take an (opinion)poll for the south side to get the free circulators? Please have the circulators serving the south side of US-60 at the earliest.

This would help many of us who ride the Express buses into downtown Phoenix by allowing us to bypass having to park and ride and create less traffic. At this time, I travel down Kyrene to get to the Express bus or other routes. The problem is both the 65 and 92 come just minutes apart on Kyrene so if you miss one, you miss them both.

would be great to haveit go to the warner/elliott area near i10/priest. I live in Ahwatukee but near the border of tempe and i would use it for short trip s to kiwanis park or over to tempe marketplace

9 & 10) In favor of expansion. We don't see any areas west of Mill served in the southern part of the city. Residents between Guadalupe and Baseline and west of Mill are generally in lower income brackets and are more likely to benefit from a neighborhood shuttle. We seem to be left out in the cold in all things as we are considered "rural" when dealing with the US Postal service, Qwest, City-wide Wifi, Etc. Please don't forget us in southwest Tempe. We have a much higher population density due to MDV's also.
